Roll 1D12 to determine the effect of a miscast spell

1D12 Roll	Effect
1	Water within an area surrounding the caster with a radius equal to the spell level x 20' becomes foul, causing fish to die and plants to wither.
2	A huge rainstorm drenches an area surrounding the caster with a radius equal to the spell level x 20'.
3	All fires in an area surrounding the caster with a radius equal to the spell level x 20' are immediately extinguished.
4	If the caster is within sight of the sea a Deep One arises to challenge him to combat to prove his worth in the eyes of Dagon, otherwise there is no effect other than the spell failing.
